Abricots (les), rainfall.....	49	Arcahaie (l')—Continued.	
Acknowledgments .....	26-27	clay pits near, view (Pl.	
Acul (l'), Miocene sedimentary rocks	224	XXXVIII, A) .....	506
Agriculture .....	69-76	rainfall .....	49, 50
crops for domestic consumption.	74-75	Arcahaie Plain, artesian possibilities	528
crops for export.....	70-74	surface features .....	393
future crops .....	76	water resources .....	527-528
methods .....	76	Argillite, Cerca-la-Source .....	89-90
Amphibolite, occurrence .....	308-309	Dondon .....	88
test for road material.....	495	Massif du Nord.....	86
Analyses and assays, acknowledg-		Montagnes Noires .....	92
ments for .....	25	Plaisance, analysis .....	502
basalt .....	316, 325	Plaisance Valley .....	86-88
cave earth .....	511	Trois Rivières valley, view (Pl.	
cement material .....	502	VIII, A) .....	88
copper ore .....	447, 452	Artibonite group .....	161-206
granodiorite .....	304	mollusks, view (Pl. XVI).....	192
iron ore .....	470, 478, 479	Artibonite Plain, artesian possibili-	
kaolinite .....	298	ties .....	532-533
lignite .....	482, 483, 484	general features .....	385, 530-531
limestone .....	501	geomorphology .....	385-389
manganese ore .....	475, 478, 479	ground water .....	532-533
nephelite basalt .....	316	irrigation and flood control.	531-532
pyroxene andesite .....	276	location .....	32
quartz diorite .....	292, 304	salt bush in, view (Pl. VI, B) ..	64
silver ore .....	452	shore features .....	388
waters .....	543-549, 554,	sublittoral features .....	389
	556, 561, 564, 566	water resources .....	530-533
Andesite, alteration .....	280	xerophytic vegetation in (Pl.	
analcite and analcite-olivine.	283-284	IV, B) .....	58
augite-hypersthene-hornblende .	277	Artibonite Valley, artesian possibili-	
hornblende .....	278, 330	ties .....	533
hornblende-augite .....	277-278	drainage .....	388
hornblende-mica or dacite.....	278	geomorphology .....	385-389
hypersthene .....	277, 329-330	land features .....	385-388
northern region ..	272-280, 283-284	Miocene deposits .....	206-210
pyroxene (augite-hypersthene)	274-277	Miocene fossils .....	214-218
chemical analysis and norm	276	possible oil resources.....	494
micrograph (Pl. XXII, B) .	304	stream terraces .....	384-387
relations of types.....	279	tectonic features .....	207-210, 334
southern region .....	327, 329-330	terrace in, view (Pl. XXX)....	386
Terre-Neuve district .....	430	water resources .....	533
Anse-à-Veau, earthquakes... 342-343, 346		Asile Valley, faults .....	136
rainfall .....	49, 50	igneous rocks .....	321, 323
Anse d' Hainault, residual iron de-		lignite .....	229
posits near .....	479-480	Miocene deposits .....	228-231
Anse Rouge, public water supply... 591		Miocene fossils, nonmarine....	231
Anticline of Miocene marl and lime-		pillow lava near, view (Pl. VIII,	
stone, view (Pl. XXVI, A) ..	336	B) .....	88
Aplite .....	306	structure .....	229-230
Aquin, igneous rocks.....	323	surface features .....	408-409
Aquin arrondissement, Cretaceous		Aux Cayes. <i>See</i> Cayes, les.	
deposits .....	92-93	Ayaye anticline .....	491
Arbre Plain, artesian possibilities. 535-536			
Miocene rocks and fossils....	160-161		
surface features .....	375-376		
water resources .....	535-536		
Arcahaie (l'), brick factory near,			
view (Pl. XXXVIII, B).....	506		

## B

Bahon, rainfall .....	49, 50
Bale de Henne, water supply....	590-591
Bainet, rainfall .....	49, 50
Baradères, Miocene rocks near....	225

	PAGE		PAGE
Basalt, albitized or spilitic.....	326	Bridges .....	82
alteration and metamorphism..	271-272, 285	Brown, J. S., on iron in Southern Peninsula .....	479-480
